

VENKATESHWARLU SARANGI, Ph.D

Hong Kong • LinkedIn • Github • venky.sarangi@gmail.com • CityU HK

PROFESSIONAL SUMMARY

Data Scientist and AI Engineer with a Ph.D. in Physics and 10+ years of research and applied experience, including 4 years in industry, specializing in statistical modeling, machine learning, and data-driven solutions for forecasting, demand calculation, and pricing analysis. Proficient in extracting and cleaning data from databases like PostgreSQL and MariaDB using Python (pandas, NumPy, Scikit-learn) and SQL to analyze user behavior, market patterns, and e-commerce dynamics. Experienced in building, testing, and tracking model performance against business outcomes with metrics like Precision, Recall, F1, MAE, and AUROC, while deploying scalable solutions via MLOps tools for real-world impact in fast-paced teams.

TECHNICAL SKILLS

Data Science & Machine Learning: Supervised and unsupervised learning, quantitative approaches, advanced statistical methods, data mining techniques, information retrieval, feature engineering, pattern recognition, predictive modeling, anomaly detection, time series forecasting, evaluation metrics, and experimentation. Tools: Scikit-learn, XGBoost, LightGBM, Spark, Airflow, Statistical Modeling, Sales Forecasting, Demand Calculation, Pricing Strategy Analysis, Data Extraction and Cleaning, PostgreSQL, MariaDB, User Behavior Analysis, Market Pattern Identification, Model Performance Tracking, Python (Pandas, NumPy, Scikit-learn), SQL, Time Series Forecasting, Anomaly Detection, MLOps (Docker, MLflow, CI/CD).

WORK EXPERIENCE

DATA SCIENTIST & ML ENGINEER

Freelancer at XRadio Ltd, HK
(Aug, 2025 – March, 2026)

Deep Learning and Multimodal Systems for ECG Signal Intelligence

- Built an explainable deep learning model for 12-lead ECG arrhythmia classification, addressing challenges from non-stationary signals and inter-patient variability.
- Evaluated multiple deep learning and vision architectures including ResNet34, ResNet50, DenseNet, and VGG16, Vision Transformers (ViT) and Vision-Language Models (VLMs), multimodal AI systems for healthcare prediction tasks.
- Achieved strong model performance with ResNet34, reaching AUROC 0.98 and F1-score 0.826 across nine arrhythmia categories.

DATA SCIENTIST & RESEARCH ENGINEER

Gense Technologies Ltd, HK
(Oct, 2022 – Aug, 2025)

Projects & Technical Experience

- Designed and deployed end-to-end supervised learning pipelines with ML models for clinical prediction tasks, achieving 87% sensitivity and >99% specificity on imbalanced biomedical datasets.
- Engineered feature extraction and signal processing workflows using Python (NumPy, Pandas, Scikit-learn) to improve SNR and diagnostic quality in time-series bio-conductivity data.
- Achieved a 100% improvement in skin electrode contact impedance without conductive gels, improving signal sensitivity.
- Developed and validated signal enhancement and impedance analysis models for ECG and EIT datasets, improving signal-to-noise ratio and diagnostic reliability.
- Built automated MLOps workflows with Docker, CI/CD, and MLflow for experiment tracking, model versioning, and reproducible deployments across cloud environments. Applied statistical validation frameworks (k-fold cross-validation, ROC-AUC optimization, hypothesis testing) to ensure diagnostic-grade model reliability and regulatory compliance.
- Developed synthetic data augmentation strategies (SMOTE, bootstrapping) to address limited clinical datasets, improving model generalization by 20%.
- Proficient in Python, SQL, PyTorch, Scikit-learn, and cloud ML platforms (GCP, Firebase, AWS SageMaker) for scalable production systems.

DATA SCIENTIST AND COMPUTATIONAL ANALYST

Anvipro IT Solutions, India

(December, 2021 – June, 2022)

Materials Science & Computational Modeling

- Applied supervised learning and statistical modeling techniques to analyze material properties, identify trends, and support predictive insights.
- Conducted physics-based simulation and data analysis using COMSOL Multiphysics to study material flexibility (>90%), stress distribution, hardness, and structural behavior.

- Performed materials data preprocessing, cleaning, and refinement using MATLAB and Python basic libraries to improve analysis quality and model readiness.
- Improved simulation and analytical workflows through iterative model refinement, results evaluation, and reliability analysis for engineering and materials-focused projects.
- **Technologies:** Python, Data processing, Feature Engineering, EDA, NumPy, Pandas, Scikit-learn, OriginLab, SQL, Power BI, & Statistical Modeling.

PH.D RESEARCH SCHOLAR

CityU HK
(August, 2015 – October 2021)

Materials Engineering / Computational Modeling / Data Analysis

- Architected piezoelectric electrodes and integrated AI-driven computational modeling for material structure analysis using X-ray and neutron diffraction datasets, aligning with predictive AI solutions for operational efficiency.
- Delivered Rietveld refinement and data processing, feature engineering, and regression-based parameter optimization, fine-tuning methods, hyperparameter tuning to extract structural insights from complex datasets, incorporating Machine Learning frameworks like Scikit-learn for enhanced prediction tasks.
- Published research in Nature Communications, Communications Physics, Physical Review B, Scientific Reports, and other high-impact journals, focusing on innovative AI applications in materials science.

EDUCATION | TRAINING - CERTIFICATIONS

IIT Bombay India and CityU HK,

- **Ph.D.** Materials Science and Eng (Physics), City University of Hong Kong, (Oct, 2021)
- **M.Tech.** Materials Science and Eng (Physics), IIT Bombay, India, (June, 2013)
- **Generative AI with Large Language Models (LLMs)**
- DeepLearning.AI & Amazon Web Services | Coursera | February 2026
- Skills: NLP, Transformers Architecture (FLAN-T5, BERT, GPT, DeepSeek, Qwen) · RL models · PyTorch · PEFT · Fine-tuning · LoRA · QLoRa · Knowledge Distillation · RAG · LangChain · LangGraph · Deployment · Ollama, vLLM, OpenWebUI, FastAPI, Streamlit, RunPOD, LightningAI, vLLM, HuggingFace, Optuna
- **Machine Learning Specialization** | August 2025
- **Deep Learning and NLP Specialization** | January 2026
- Stanford University & DeepLearning.AI | Coursera
- **End-to-End MLOPS Bootcamp** | Udemy | April 2026
